

MUSKELLUNGE

A Few “Muskie” Facts:

“Muskies” are the largest member of the Pike Family.

The NJ State record is almost 43 Pounds!

In NJ, “Muskies” inhabit Greenwood Lake, Monksville and Echo Lake Reservoirs, Lake Hopatcong and the Delaware River.

Catch & Release!

Bring a camera, preserve the memory of your catch, and release.

Always use steel leaders, and use lures rather than live bait.

Keep handy long-nosed pliers, hook removers, jaw spreaders and bolt cutters for quick release and hand protection!

Remove hooks while fish is in the water...

NEVER lay the fish in the boat, especially in hot weather!

Minimum size limit is 40” in Echo Lake, 36” elsewhere.

Mi22.com

Northern New Jersey Muskies Inc. is Chapter 22 of Muskies Inc. an International non-profit organization whose mission includes the promotion and protection of a high quality muskellunge sport fishery and the commitment to the abatement of water pollution, utilization of scientific study, maintenance of records of muskie habits, growth and range plus the dissemination of muskie info for all.

“LET THEM GO AND LET THEM GROW.”
